- Entrance ticket
- Sightseeing bus ticket
- Tour guide services
- Lunch in the mountain and dinner in Yanji city
- Travel agency liability insurance
- 5 Star hotel (one night)

The price excludes:

- Personal expenses

Introductions for Changbai Mountain (Changbaishan) and Heavenly Lake

Located in the counties of Antu, Wusong and Changbai in southern Jilin Province, Changbaishan is one of China's nature preservation zones, covering an area of over 200,000 hectares, extending 78.5 kilometers north to south, and 53.3 kilometers west to east. It has a wholesome natural environment and ecosystem with world famous precious animals like Northeast Tigers, sikas, sables etc. It's China's typical comprehensive nature existence of world importance.
The Crater Lake - The Deepest Lake in China - Changbai Shan Mountain's “Heavenly Lake” in Jilin Province is a lake that straddles the border between China and North Korea and is the source of the Songhua River. At 2,150 meters above sea-level, it is often called the ‘Heavenly Lake’. The crater in which the lake sits was originally an active volcano which erupted 3 times from the 16th century; after the volcano became dormant again water began to build up eventually forming into the Heavenly Lake that exists today. The lake itself stretches 13 kilometers long with an average depth of 204 meters and a maximum depth of 373 meters. The Heavenly Lake is just like a jewel in a crown of thorns surrounded by 16 gigantic jagged peaks. The rich volcanic stones leech into the water creating a striking blue coloration. In total the lake holds over 20 million cubic liters of water mainly provided by rain and snowfall, the temperature and climate around the lake can vary violently but the scenery always remains striking and uniquely beautiful.

The Waterfall of Changbaishan - The water of the Heavenly Lake finds its way out through an opening in the northern bank and at a vertical cliff, 1250 meters away, drops 68 meters down with loud rumbles. The Changbai Waterfall hangs in the air like a white ribbon.

The Hot Springs of Changbaishan - At the north side of the White-Head Mountain, there is a group of hot springs coverings an area of over one thousand square meters. Two white
rivers wind their ways among the hot springs. The right banks where the mouths of springs concentrate are shrouded in hot misty air all the year round. The springs vary in temperature, with the highest reaching 82 degree Celsius. The hot waters contain hydrogen sulphide and have high medical value.

The Primeval Forests: The vast sea of forests appears mysterious and bizarre. No old sky-piercing trees have ever been felled. Natural-grown upside down trees are covered with moth, and young trees shoot just from the old rotten roots.

**Useful Tips:**

1. *It is always very cool in Changbai Mountain; bring some thick clothes, such as sweater and overcoat is a perfect choice.*

2. *For the unexpected weather, visitors are highly recommended to bring water-proof clothes and skid-proof shoes.*

3. *Please carry your valid documentation with you.*
